ExESS EHS-Management

EHS-MANAGEMENT WITH ExESS

Comply with current and upcoming regulations, optimize processes and mitigate risks.

Companies involved in the supply, distribution and storage of hazardous goods are in safe hands with Lisam.

Our comprehensive EHS-Management software suite, ExESS, intelligently assists you in the management of complex tasks and production of the documentation required in the safe handling of hazardous products as well as helping to protect the health and safety of workers and end users.

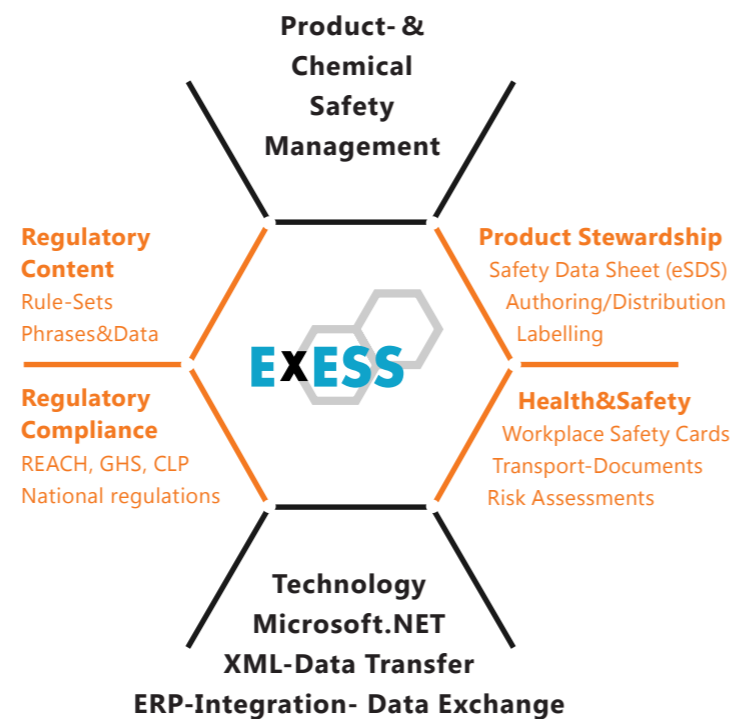

Whilst improving processes such as the creation of Safety Data Sheets (SDS), extended Safety Data Sheets (eSDS), risk assessments and ensuring compliance with REACH, CLP and the various GHS jurisdictions etc; ExESS can reduce costs, save time and mitigates many of the environmental, health and safety risks.

ExESS Capabilities at a glance

/ **Product- and Chemical Safety,** enables you to comply with all Product Safety Stewardship Rules, this in turn facilitates the placement of compliant products onto new and existing markets.

/ **Safety Data Sheet Management,** automates material classifications, for generation distribution of Safety Data Sheets (SDS or eSDS).

/ **Health and Safety,** utilizes a database to manage workplace safety information, so can quickly and easily generate documents for safe chemicals and hazardous materials handling and protective and emergency measures.

Lisam ExESS supports

- Regulatory Compliance (REACH, GHS, CLP)
- Chemicals Safety Management
- Safety Data Sheet Authoring and Distribution (SDS, eSDS)
- Labelling Management
- Health and Safety Management
- Regulatory Content, RulesSets, Phrases and Catalogs
- Integration to leading ERP Solutions
i.e. SAP, Oracle, Microsoft

/ **Regulatory Content,** offers global regulatory rule sets and Phrase Libraries in more than 50 Languages/Regions.

/ **Microsoft Technology,** ExESS software is built on Microsoft .NET technology and is fully compatible with Microsoft Office. This makes ExESS user friendly, flattens the learning curve which leads to a flexible, fast and easy implementation. Furthermore it is easy to integrate with ERP's, e.g. SAP, Oracle etc..

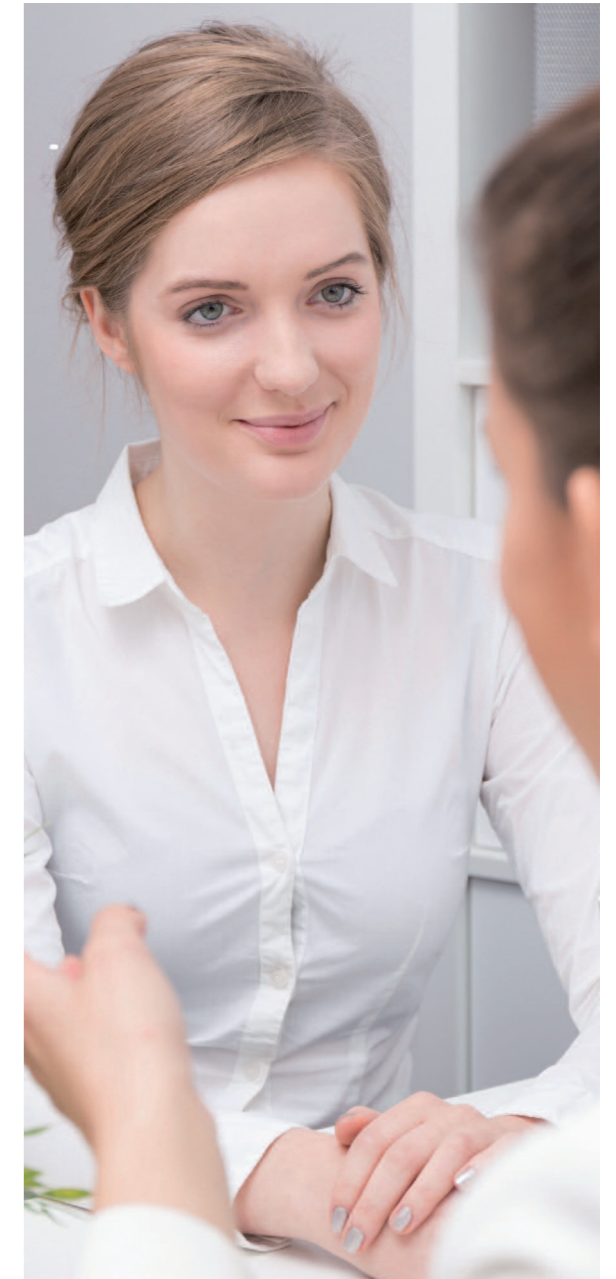

Benefits for you and your business

With Lisam ExESS and its intelligent EHS-Management capabilities, you will be able to proactively manage current and future EHS information and processes. This will help you to:

/ **Comply with current and forthcoming regulations**
You can automate EHS processes and create the required EHS-documentation faster whilst providing a better quality. This helps avoid financial penalties, mitigates risks and improves worker and consumer safety.

/ **Ease industry compliance tasks**
ExESS provides modules with specialized functions and content for process industries e.g. chemical, fragrances, cosmetics, detergents & gas sectors. These have been developed in partnership with leading industry partners and associations.

/ **Improve processes and optimize costs**
ExESS helps you optimize processes by using actualized substance information, classifications, reg. classification calculations for the authoring & distribution of all compliance documents. Saving you time therefore cost.
